

DATA SHEET
Sunflower Oil

Sunflower Oil

Seed Oils for each type of use

Sunflower oil BASSO is extracted from the dried seeds of the Helianthus Annus plant and it is rich of polyunsaturated fatty acids, particularly linoleic acid, precursor of omega 6, essential fatty acids that are not synthesized by the body and must be introduced only with the diet. Another this oil peculiarity is to be especially rich in Vitamin E and in tocopherols content, powerful antioxidants that preserve rancidity and give, if it is used raw, an important anti-aging action due to they are able to counter the harmful free radicals effect in our body. Sunflower oil BASSO is used preferably on raw dishes to take full advantage of its Vitamin E content. It is ideal for dressing in salads or cold dishes, for the preparation of canned vegetable or as a base for sauces. Less suitable for frying because it is an easily degradable fatty to high temperatures.
